What Do People Want from Information Retrieval? - D-Lib Magazine This book's purpose is to teach people who will be searching or designing text retrieval systems how the systems work. For designers, it covers problems they face when building text retrieval systems. For users, it explains what they can expect from text retrieval systems. The book covers a wide range of topics, including retrieval effectiveness, evaluation, and ethical considerations. It also includes case studies of real-world text retrieval systems. The book is well-written and easy to read, making it accessible to a broad audience.
